Breastfeeding Around the World showcases 36 tender and intimate images of mothers breastfeeding their babies in a variety of situations and cultures all over the world. Accompanied by an engaging, simple text in both English and Spanish, this new bilingual title by Moonstone Press LLC highlights the importance of breastfeeding and emphasizes the value of a mother's milk as the best nutrition for a child's health early in life. It also portrays breastfeeding as a wonderful way to bond with one's newborn and family members.

“Not only do our moms connect with photos of their own culture, they can also see that breastfeeding is the norm in every part of the world. The sweet, tender images of mothers breastfeeding their babies evoke that very special feeling only a mom knows as she nurtures new life.”
Edie Wiltsee, MPH, MS, CLC, Nutrition Services Branch Chief, Monterey County CA Health Department
